PUBLIC SCHOOL TEXT-BOOKS. The Way in Which They are Sometimes

A correspondent of the Charleston accomplish it, the mate News and Courier makes the startling disclosure which follows in regard to the negotiations of a South Carolina official with several New York publishers:

Selected.

NEW YORK, October 16. I have come into the possession of certain facts, relative to the recent adoption of books for the public schools of South Carolina, which will, I am sure, interest | bury, the secreta! R Co your readers. The commission appointed to make the adoption was composed of Gov. Chamberlain, H. L. Shrewsbury, charges made ag colored, J. Douglas Robertson, W. Beverly Nash, colored, and H. J. Maxwell, colored. Gov. Chamberlain is supposed to have had only a nominal connection with the thing, he being absent at the North at the time the commission met.

You will recall the action of the commission in recommending a complete change of the books now used in the public schools of the State, and you probably have wondered what the object was in making this wholesale displacement, especially as the books adopted by the State board in 1870, and which are now very generally in use, are old standard series of national repute. I think I can throw some light on the subject. The whole thing is a job, and the "Boss" of it is that "Christian statesman" and "financier," the Hon. J. Douglas Robertson, of Beaufort, chairman of the committee on education of your House of

Representatives. Mr. Robertson last spring came North to "strike" the publishers, the common prey of all the carpet-bag "educators" in the South. He visited the houses that publish school books, and diligently and earnestly presented his plans for securing their co-operation in his scheme. He proposed in behalf of the State to make a contract with such houses as would join him, by which the State would be bound for ten years to the adoption of such of their books as the commission should select. The consideration for this was that these houses should appoint his brother-in-law as the sole distributing agent for their publications, and that a central depot should be established, say at Columbia, in charge of this brother-inlaw, where the books should be sent on commission, and that the brother-in-law should get a percentage on all the books distributed from this depository. Robertson himself said he should be elected State superintendent of education at the next election, and that he would then use the influence of his office to force the books into the schools. In this very bold and impudent scheme he did not succeed as well as he expected. He passers from sun ar found that the large houses, whom he supposed would be eager to jump at his holt supposed would be eager to jump at his balt, spurned him and his proposition, and so he returned home much discom-

hand unmistakably. This firm is one of shoe-shaped moat, ke fille the largest educational publishing houses at an elevation of one curteen feet which wou in the country, and Robertson made a bold dash for their safe. Here is what fire. The edifices are will o iron stanhe says in his letter, which was written just before the meeting of the commis-

must be deemed confidential, so that I markable strength withstan may write freely to you. If so, inform yearly inundation of the me, and then I can tell you what steps submerges the whole local are taken in the board of commissioners only the tallest structure from time to time. The interest of your above the waters, lil, mining house will not suffer in this matter, so It is a strange coutt; a long as left to me, and one attorney inside | 150,000 inhabits the commission will be worth half a dozen every description

who supplied a country pulpit last Sun-Monday morning to travel by stage-coach rattle in the gentleman's carpet bag which sounded to him like pieces of steel striking together. Putting the gentleman's reserved manner, keen appearance and the gether, the driver concluded that his passenger was a first-class burglar-perhaps a bank burglar-and after his arrival at the depot he banted up an officer and impected burglar pacing up and down the platform, waiting for the train. The officer thought him a suspicious-looking character, and his suspicions were confirmed by the temetity with which the gentleman clung to the carpet-bag, for it was never out of his hand from the time in Norwich if the gentleman stopped wich the gentleman alighted and went that it was with great difficulty that ti Creater had made a mistake, and put too topics. When the poor editor, harried up town, shadowed closely by the other many legs on the dog and not enough on and bullied by these assaults, timidly man until he found a policeman, when, hesitates to express any opinion for fear pointing out the suspected party, he in-

and this is the most dangerous ground of thing used by man. In order to secure "Yes," I replied stroking his silken all to tread. If you say more of one this result, invention has been stimulaman than another, look out for trouble, ted and wonderful machines constantly If you omit to notice everything that placed before the world. We saw yesterhappens, you have no enterprise in jour- day a remarkable specimen of this spirit. nalism; if, filled with a determination Only a few years ago, all the shingles between man and name, a dropping of the district, and govern him by the law district, and govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chattabar had govern him by the law of the Chat publish full reports of what occurs, ten genius gave to mankind the shingling chances to one somebody is going to machine. This simply sawed square come down on you for making private blocks into shingles. The production matters public property, and causing had to undergo a second manipulation scandal. And the "personals!" One to bring them to proper shape, and much man says, "who cares whether Mr. A. time and material was lost. In 1870 Mr. was in town last week, or Mr. B. went to O. T. Williams, of Kentucky, obtained Charleston, or Mr. C. has a bad cold; a patent for a new shingling machine, they are of no consequence; don't be which cut the block of word into shinalways thrusting such trush upon your gles, instead of sawing it. For somereaders, or I, for one, will quit taking time Mr. Williams has been employed at your paper." But if this same man does the foundry of Pendleton & Boardman, anything which he thinks worth notice; now Pendleton & Penny, in this city, and if he leaves home or returns, or paints has greatly perfected and improved his his fence, or cuts his finger, or displays invention. Last May he took out anothherd-dog who died by his masters any enterprise, and does not receive any er patent. One of the improved ma-"personal"—the next time he meets you, chines has been constructed at the founto say, "you notice and puff dry, and yesterday, through the courtesy drover who purchased stock, and when a lif you chance to be pleased with a ser- or rough cypress is placed in the maherd was collected drove them to tide- mon by a divine, and express your gratis chine, and the shingles immediately apwater, and then shipped them to New York for sale.
